Jan 2020 **Shareable Travel Maps** – <https://shareablemaps.com/>
laravel, bootstrap-4, jquery, axios, ubuntu

Shareable travel Maps is a map sharing service that utilizes Google's Maps™ to freely share travel suggestions, along with rich content such as small tips and info and photographs.

Each map contains:

specialized pins to places of interest with colors having different meanings suggested days to stay rich text containing small informational bits such as (working hours, admission prices, etc) An important factor is that all maps can be loaded on Google's Maps™ mobile application and can be used in conjunction with the GPS service provided by the mobile device. All maps are free to use and share in social media.

Users can filter maps according to their interests. The service uses the associated tags on each map to provide search – filter results.
